WHAT MAKES OUR BEAUTIFUL FAUCET AMAZINGLY DURABLE?

Multiple tests are performed by Hindware to ensure that our coloured faucets are as thoughtfully efficient as they are beautiful. The products boast of multiple benefits due to these tests.

THE HINDWARE ADVANTAGE THAT GIVES THIS MASTERPIECE A PERFECT FINISH.

Brass Surface acts as a solid base.

STEP 2

Chrome Coating leads to long lasting shine.

STEP 3

Nickel Coating prevents corrosion.

STEP 4

Physical Vapour Deposition ensures a rich durable colour coating.

Colour is beautiful. But they become truly delightful when they stay beautiful, over time. Which is why we've gone the extra mile to deliver true quality.

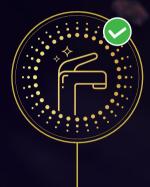

Physical Vapour Deposition (PVD) is a process based on the strategy of vaporizing a substance and easing the deposition of it (through a vacuum or plasma environment) onto another material.

The gradual and even deposition of the vapour will create an extra layer. Faucets, showers, and accessories crafted using the PVD process get an extremely vibrant colour and marvellous durability.

PVD PROCESS GIVES A BRIGHT, DAZZLING, AND DURABLE FINISH.

STRINGENT QUALITY CHECKS ARE CONDUCTED BEFORE, DURING, AND AFTER THE PVD PROCESS TO CREATE AN EFFICIENT, STUNNING, AND DURABLE FAUCET.

SALT SPRAY TEST is performed to prevent corrosion and make sure that the stunning look of the faucet doesn't get spoilt by rusting over time.

FLOW RATE TEST is done to ensure durability no matter what the water pressure.

LEAKAGE TEST results in a faucet which doesn't leak at all, even when used over a long period of time.

ENDURANCE TEST creates a strong faucet that you can use for ages without any worry.

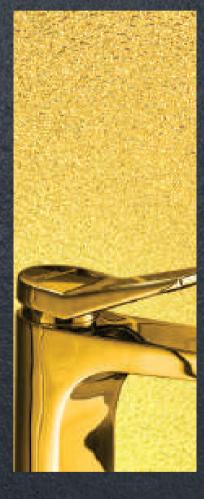

COLOUR ME GORGEOUS

COLOUR ME FABULOUS
